

Adjusting your settings to streamline one sale to the next

We know how important it is for your Verofy® Move to make things quick and easy for you during busy periods and that's why we have the **Sale Default** option.

This option streamlines your sales process, by returning to the **Enter amount** screen after each sale, saving you unnecessary clicks.

To enable it, follow the steps below.

1. Head to the **Settings** menu from the main menu screen and select the **App Settings** option.
