Charging cradle

Charging cradles are a great accessory to your Verofy® Move.

If you don't have a charging cradle but would like to request one, you can do so by contacting us via the message centre in app.

> Please note, there will be an upfront cost to purchase a cradle. We can discuss this with you when you contact us.

How does it work?

To plug the cradle in, you'll need to use the power port and USB-C wire provided with the Verofy® Move terminal. The USB-C plugs into the back of the cradle and then your Verofy® Move sits in the cradle to charge. If you prefer, the USB-C wire can plug directly into a USB device rather than a mains plug.
