Finding a specific settlement

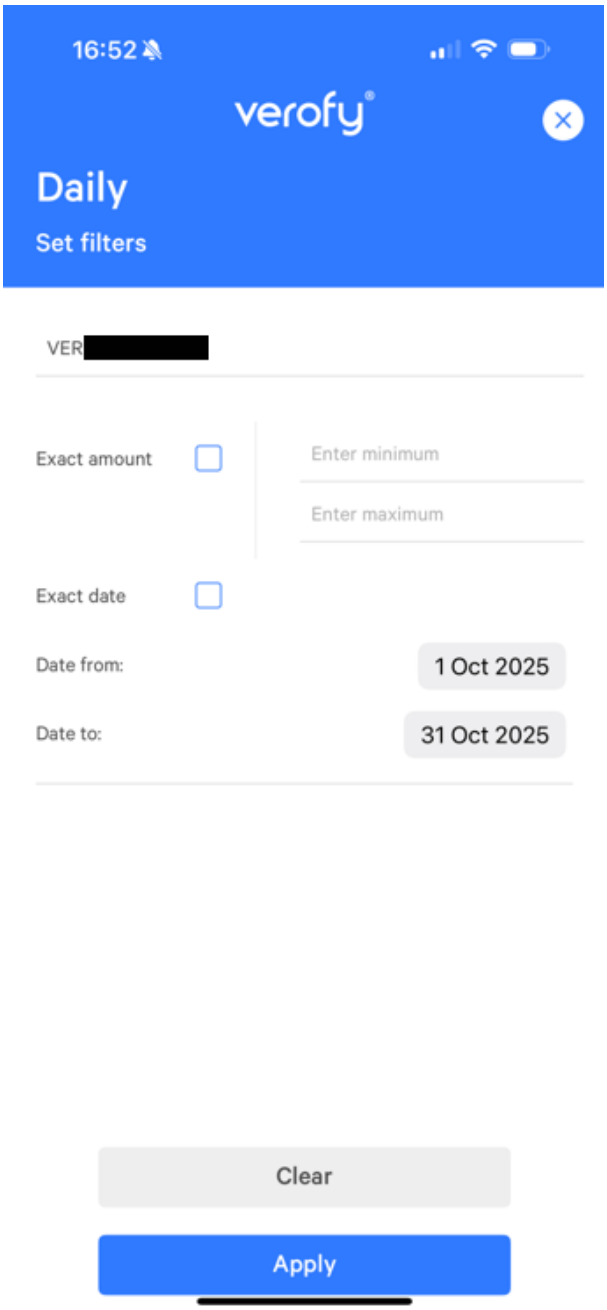

To locate a specific transaction, head to the **Settlements** option in the Verofy® App.

Select the **filter** button in the top right of the page to open the advanced options for filtering a settlement.

You can find settlements by searching by the settlement reference or by a specified or range amount. You can also filter by a specific date, or between date ranges. In the example below, the user is looking for a settlement using the settlement reference.

Click to find out how to **view settlement detail**, **download and share a PDF breakdown for a settlement** or **view and download monthly settlement statements**.

If you are having trouble finding a specific settlement, need support with a settlement you've been paid or need support with using the filters in the Settlements tab, **contact us**.
