Take control of your notification settings

To check or change your notification settings in Verofy® Cloud, **log in** and head to the Settings cog at the top right of the screen.

You'll be directed to the Users tab. From here, select the **Notifications** tab. You'll see the default notification settings. This will show you which notification are sent to you by email, push or text (SMS). For any with a tick box, you can amend how you receive notification. Some notifications we have to tell you about and therefore you can't change these (they are identified by the N/A). Select your preferences for the notifications you manage and press **Save** to update the changes.
